October CMS SEO Toolkit Plugin Documentation

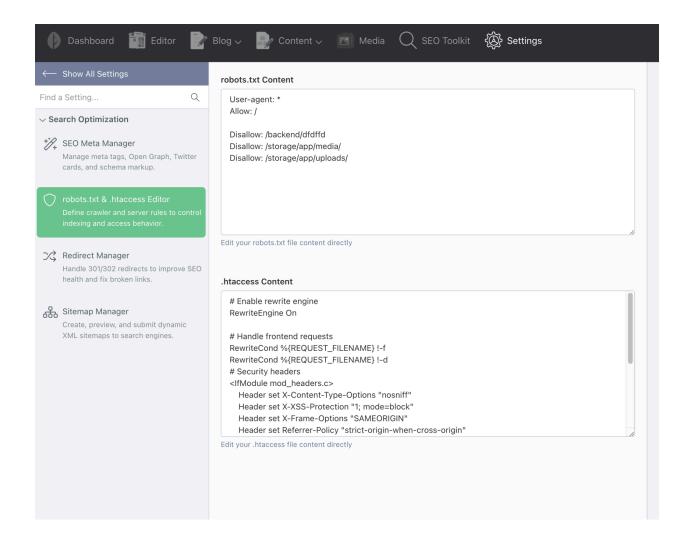

Overview

The October CMS SEO Toolkit Plugin is designed to enhance your website's search engine optimization (SEO) capabilities. This document provides a comprehensive guide on how to configure and utilize the various features of the plugin effectively.

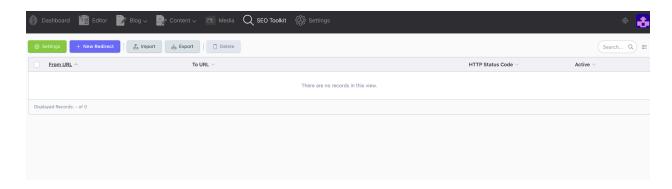

1. Robots.txt Configuration

To ensure that your `robots.txt` file is functioning correctly, it is essential to set the file permissions to **777**. This allows search engine crawlers to access the file without restrictions.

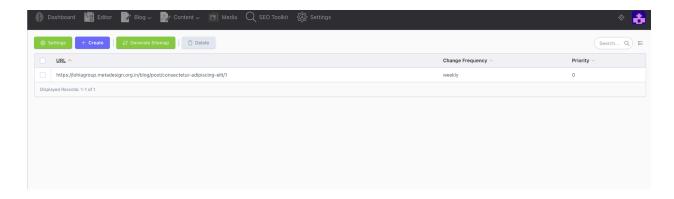

2. Redirect Manager

The Redirect Manager feature allows you to manage URL redirects efficiently. This is crucial for maintaining SEO integrity when URLs change or when content is moved.

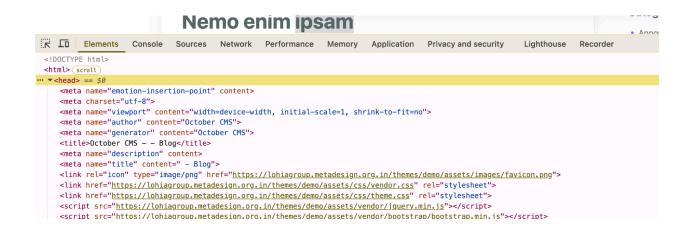

3. Sitemap Manager

The Sitemap Manager helps you create and manage your XML sitemaps, which are essential for search engines to index your website effectively.

4. Meta Tags Configuration

If your meta tags are not displaying correctly, ensure that you have added the necessary tags within the `<head>` section of your HTML.

Default Blog Layout File

After making changes to your layout, you need to include the following line inside the `<head>` tag to enable meta tags:

```
1
2 description = "Blog layout"
3
4 [resources]
5 vars[activeBlogCategory] = ""
6 ==
7 <!DOCTYPE html>
8 <html>
9
      <head>
10
         {% partial 'site/head/head-meta' %}
11
          <title>October CMS - {{ this.page.meta_title ?: placeholder('pageTitle') }}</title>
          <meta name="description" content="{{ this.page.meta_description }}">
12
          <meta name="title" content="{{ this.page.meta_title }}">
13
14
          {% partial 'site/head/head-links' %}
15
           {% partial 'site/head/head-scripts' %}
16
           {% partial 'site/head/analytics-code' %}
17
      </head>
18
        <body class="layout-blog">
19
20
           <!-- Header -->
           <header id="layout-header">
21
            {% partial 'site/header' %}
22
        </header>
```

After changes

```
[metaTags]
==
```

You need to add this inside the Head tag

```
{% component 'metaTags' %}
```

If the following lines are present in your default layout, you can remove them, as the component will already display the necessary meta tags:

```
<meta name="description" content="{{ this.page.meta_description }}">
<meta name="title" content="{{ this.page.meta_title }}">
```

After adding the component to the file, it will look like this

```
1
 2
     description = "Blog layout"
 3
 4
     [resources]
 5
     [metaTags]
     vars[activeBlogCategory] = ""
 6
 8
     <!DOCTYPE html>
 9
10
         <head>
11
             {% partial 'site/head/head-meta' %}
12
             <title>October CMS - {{ this.page.meta_title ?: placeholder('pageTitle') }}</title>
13
             <!-- <meta name="description" content="{{ this.page.meta_description }}">
14
             <meta name="title" content="{{ this.page.meta_title }}"> -->
15
             {% component 'metaTags' %}
16
             {% partial 'site/head/head-links' %}
             {% partial 'site/head/head-scripts' %}
17
18
             {% partial 'site/head/analytics-code' %}
19
         </head>
         <body class="layout-blog">
20
```

5. Verifying Changes

To verify that your changes have been applied correctly, you can use the "Inspect Element" feature in your web browser or view the page source. This will allow you to see the updated meta tags and other SEO-related changes.

```
Elements Console
                                                                                                                                                                                                                                                                                                                  Network
                                                                                                                                                                                                                                                                                                                                                                                             Performance
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Memory
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Application
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Privacy and security
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Lighthouse >>

6. SEO Tabs in the Backend

In the backend of your October CMS, the SEO tabs will display the following:

- **Recommended Length**: You will see the recommended character lengths for the title and description fields.
- **Overview and Score**: The plugin provides an overview and a score based on various SEO factors. This score is displayed on the right side of the interface.
- **Recommendations**: Based on the score, the plugin will offer recommendations to improve your page's SEO performance.

By following these guidelines, you can effectively utilize the October CMS SEO Toolkit Plugin to enhance your website's visibility and performance in search engine results.
